What InputDojo is

InputDojo is a language-learning platform built around **real content**. A teacher pastes a YouTube link, an article URL, a PDF or a subtitle file, and the platform turns it into a complete study lesson: tap-to-look-up words, saved vocabulary with the sentence it came from, grammar explanations, generated quizzes and spaced-repetition review.

Students study material they actually want to read. Teachers get the part that is normally invisible — who finished, how long it took, and which words caused trouble.

It is not limited to what you can find online. Teachers build their own courses from their own syllabus: photograph a textbook page or a handout with a phone camera, upload a scan, screenshot or PDF, or paste text straight in. The words are read off the image and become a lesson with the same lookups, vocabulary and review as any other — so the books you already teach with keep working.

14 languages, including Japanese, Chinese, Korean, Spanish, French, German and Arabic. Built-in exam tracks for JLPT, HSK and CEFR. Runs in any browser and installs on phones as an app.

The learner dashboard: today's task, streak and study plan.

Why teachers trust it with a class

InputDojo is a subscription product with no advertising and no student charges, built and supported directly by its development team. Nothing is shown to students that a teacher did not put there, and every figure in this document reflects the live product — not a roadmap.

For teachers

The classroom work that normally happens after hours — sourcing material, levelling it, building worksheets, chasing homework — is what InputDojo removes.

Assign in minutes, not evenings

Paste a YouTube link, an article URL or a PDF. InputDojo turns it into a study lesson with word lookups, vocabulary and comprehension support already built in — no worksheet to make.

Your own material, not just what is online

Photograph a textbook page or a handout with your phone, upload a scan or screenshot, or paste your own text — the text is read off the image and becomes a lesson like any other. Build your own courses from your own syllabus and keep using the books you already teach with.

See who actually did the work

Completion, time spent and unknown-word density per student, per assignment. You walk into class knowing who is stuck and on which words.

A shared vocabulary record

Every word a student looks up is saved with the sentence it appeared in, so class word lists and quizzes build themselves.

Exam alignment out of the box

JLPT N5-N1, HSK 1-9 and CEFR A1-C2 tracks show each learner's readiness against a real curriculum.

Ready-made Japanese courses, already illustrated

Seven guided tracks — Foundations, Kana, N5, N4, Kanji, Vocabulary Sprints and Grammar Labs — with every lesson written around one illustrated scene. Assign a whole track to a class and follow them through it, with nothing to prepare.

Mark written work without the paperwork

Students write in the app; you annotate inline, score against a rubric and reuse your own saved comment phrases. Feedback goes back with a read receipt, and students can reply in the same thread.

Homework that repeats itself

Set a weekly reading or review task once and it is issued automatically, to the whole class or to named students only.

Reports parents can read

A shareable progress report per student — lessons completed, words learned, active days — without giving a guardian an account or access to anyone else's data.

Paperless enrollment

One invite link or a bulk email. Students join on any device — no app store, no IT approval, no passwords to reset.

No ads, ever

Nothing is shown to your students on any plan, and student data is never sold or used to train models.

For students

Students keep coming back because the material is theirs and the progress is visible.

Content they actually care about

Dramas, news, songs, novels, YouTube channels — the material stays authentic instead of textbook-flat.

Instant, in-context lookups

One tap on any word gives reading, meaning and the sentence it came from, in the learner's own interface language.

Review that remembers for them

Saved words enter a spaced-repetition schedule with typing, listening and handwriting drills on phone or laptop.

Progress they can see

Streaks, a daily target and an exam-readiness view that turns study time into a number they can watch move.

An AI tutor for the 9pm question

Grammar explanations grounded in the exact sentence in front of them — so you are not the only source of answers.

Students study real material with instant lookups and support built into the page.

Ready-made Japanese courses

Japanese departments do not have to build anything to start. InputDojo ships **7 guided tracks** — 156 lessons, roughly 28 hours of study — written in-house and illustrated scene by scene. Every lesson opens on a picture, teaches through the dialogue in it, and ends with a check the student has to pass.

The whole set follows one cast in one small café, so a beginner meets the same people in lesson 1 and lesson 100. That continuity is what keeps a class reading past week three.

Foundations, N5 and N4 scenes — the artwork students actually see.

Track	Level	Lessons	Study time	What it covers
Japanese Foundations	Absolute beginner	16	≈3 h	Short story lessons that take you from your first two signs to reading a whole scene.
Kana Sprints	Optional side path	12	≈1 h	Quick sprints through hiragana and katakana, taken whenever the script slows a learner down.
Japanese N5	Beginner (JLPT N5)	24	≈6 h	The full N5 story arc: everyday verbs, places, comparisons, requests and plans.
Japanese N4	Upper beginner (JLPT N4)	24	≈5 h	The season after Open Day: favours, conditions, guesses, and being the one people rely on.
Kanji Units	Beginner (JLPT N5)	28	≈4 h	The N5 characters, taught through words learners already say — and the radicals that hold them together.
Vocabulary Sprints	Optional side path	40	≈7 h	The words the story lessons have no room for: twenty at a time, grouped by where they are used.
Grammar Labs	Optional side path	12	≈2 h	Short drill labs on verb and adjective forms, for when a pattern needs a second pass.

Assign a whole track to a class, or a single lesson as homework. Progress, completion and the words each student saved are reported exactly as they are for imported material.

Inside a guided lesson

A scene from Japanese N5. Learners read the dialogue, tap any word for reading and meaning, then answer in Japanese.

Each lesson runs the same shape:

- **A scene** — one illustrated moment with two or three lines of natural Japanese
- **Notice and try** — the pattern is shown in use before it is named
- **Practice** — production, not recognition: the learner types or says the line
- **A can-do check** — a stated outcome such as “Greet someone, thank them, get their attention, and answer a yes-or-no question.”

The cast

One café, one small group of people, every lesson — Aki who runs it, Ren behind the counter, Haru who fixes what Ren labels, Satō the regular, Maya the student who is always late, and Mugi the café cat.

See them before you sign up

Every track has a free public preview — no account needed. Browse the catalogue at inputdojo.com/learn/japanese/catalog and open any lesson you would consider assigning.

Marking written work

Students write into the assignment instead of into a document you have to collect. You mark it where it is written, and the whole exchange stays attached to the lesson it came from.

- **Inline annotations** — highlight a phrase and comment on that phrase, not on the essay in general
- **Rubrics** — score against your own criteria; the totals roll into the gradebook
- **Saved feedback phrases** — the comments you write every week, reusable in one click
- **Revision history** — see what changed between a draft and the version handed in
- **Threaded replies** — a student can answer your comment, with a read receipt so you know it landed

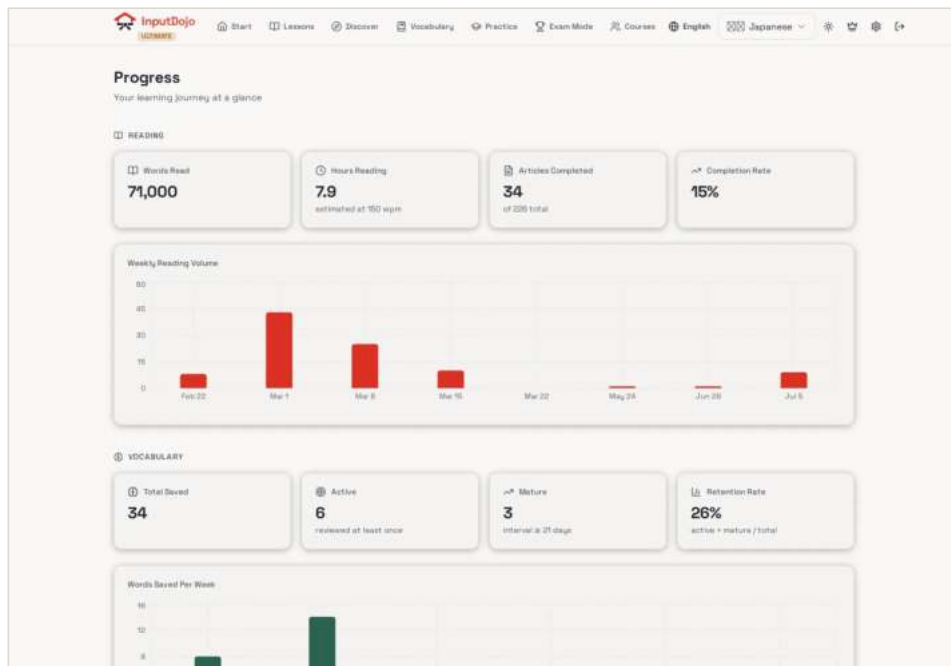

Recurring homework and reporting

- **Recurring assignments** — set a weekly reading or review task once and it issues itself
- **Targeted assignments** — the whole class, or named students only, for differentiation
- **Guardian reports** — a shareable progress link per student, no account required for the parent
- **Gradebook and vocabulary export** — CSV, plus Anki-compatible decks for the class word list

Exam readiness and analytics

Reading and review activity feeds a readiness view per learner. Instead of a vague sense that a class is "about N4", you see coverage of the vocabulary, kanji and grammar each level requires, and what is still missing.

- **JLPT N5-N1** — vocabulary, kanji and grammar coverage per level
- **HSK 1-9** — vocabulary, hanzi and grammar coverage per level
- **CEFR A1-C2** — for English and European languages
- Mock exams and drills that reuse the words a student has actually met

Exam readiness and study progress, tracked automatically as students read and review.

Class-level analytics roll the same data up: average progress, most-looked-up words, assignments completed, and which students have gone quiet.

Plans for teachers and schools

Plan	Monthly	Annual	Students	Included
Teacher	\$29 / month	\$290 / year	30 students	Courses, assignments, per-student analytics, vocabulary insight, AI grammar tutor
Teacher Pro	\$49 / month	\$490 / year	100 students	Everything in Teacher, plus multi-course analytics, bulk invites, gradebook export, priority support

Students are never charged. A student in your course uses InputDojo free; seats are counted as distinct students across all of your courses. Schools running more than 100 students, or needing invoicing, a purchase order or a data-processing agreement, are handled directly — write to us.

How schools use it

- **Language departments** — one course per class, weekly reading and listening assignments
- **Exam prep schools** — JLPT/HSK tracks with readiness reporting before the sitting
- **Private tutors** — one course per student, homework between sessions
- **International programmes** — CEFR-aligned English for non-native speakers

Privacy, security and support

The questions a school asks before it says yes — answered in one place.

- ✓ **Student data is never sold**
No advertising, no data brokers, and no student content used to train third-party models.
- ✓ **GDPR-aligned by design**
Data-processing agreement available on request, EU/US hosting, encryption in transit and at rest.
- ✓ **Export and deletion on request**
Teachers export the gradebook and vocabulary as CSV; a student account and its data can be deleted on request.
- ✓ **Teacher-controlled enrollment**
Students join through your invite link only. No public profiles, no messaging between strangers, no in-app purchases for students.
- ✓ **Works on the devices you already have**
Any modern browser, plus an installable phone app — no app-store account, no software for IT to approve.
- ✓ **Support from the people who build it**
Email support answered directly by the development team, normally within one business day.

A data-processing agreement, a security questionnaire response, invoicing against a purchase order and a named contact for your department are all available on request at support@inputdojo.com.

Start a free trial

Every teacher account starts with a **14-day free trial** of the full classroom feature set — courses, assignments, analytics and the AI tutor. No credit card, no per-student fee.

- Sign up at **inputdojo.com/for-teachers** and create your first course
- Import a video or article your class already likes
- Share the invite link — students join in one tap
- Questions, pilots or invoicing for a school: **support@inputdojo.com**

The library: imported videos, articles and PDFs turned into study lessons.
